Mini Catalog

Alarming Tags, Counterfeit Detection, Secure Receipts, and more.

Key Features

-  **98 Db Alarm**
-  **Over 120lbs pull strength**
-  **Exclusive IR Magnetic Key**
~Unauthorized magnet activates alarm
-  **Replaceable Batteries**
-  **Replaceable Alarm Section**
-  **Replaceable Tether Base**
-  **Upgradable/Backward compatible**
-  **Earth Friendly**
-  **Multi function cable design**
~ Lengths up to 52"
-  **Perfect Placement of Decoder**
~ Easily deactivate alarm
-  **Strong Visual Deterrent**
~ Blinking LED Light
-  **7 strand coated steel cable**

The Gen 5 alarming tether allows you to replace the alarm component, the retractable tether, or just the battery with ease. No need to remove the tether from the merchandise or the fixture, costing valuable labor. Allows you to reuse the functioning part of the unit saving you on product cost and saving space in landfills. Even with our discreet 7 strand steel wire we now have 120 lb. pull strength. Alarming function is easily activated with no tool necessary and with a discreetly placed hole that cannot be manipulated without the Decoder. Turn unit off with handheld 2-in-1 Decoder or easy switch. Larger battery; 3-5 year standby time. When not protecting product (Pin is not locked) it will go into standby mode. T-Stop to secure tether "lead" position, preventing smaller merchandise from being pulled off balance and allowing proper merchandising of displays. The new housing design provides for perfect placement of the decoder's IR and magnetic release to allow for quick and easy deactivation, clutch release, or battery replacement.

Key Features

-  **Smart 2 Alarm Padlock Tag**
~Communicates with tether when attached
-  **One Step Release**
-  **98 Db Alarm**
-  **Over 120lbs pull strength**
-  **Exclusive IR Magnetic Key**
~Unauthorized magnet activates alarm
-  **Replaceable Batteries**
-  **Replaceable Alarm Section**
-  **Replaceable Tether Base**
-  **Upgradable/Backward compatible**
-  **Earth Friendly**
-  **Multi function cable design**
~ Lengths up to 52"
-  **Perfect Placement of Decoder**
~ Easily deactivate alarm
-  **Strong Visual Deterrent**
~ Blinking LED Light on tether and tag
-  **49 strand coated steel cable**

The Gen 6 alarming tether systems allows you to protect your merchandise with a 2 alarm padlock tag and alarming tether that talk to each other for an added level of security and eases the deactivation process. Like its predecessor, the Gen5, The Gen 6 has replaceable components, the retractable tether, the alarm top, the 2 alarm tag, tether battery, replace them all with ease. No need to remove the tether from the merchandise or the fixture, costing valuable labor. Reuse the functioning parts of the system replacing only the damaged parts saving you on product cost and saving space in landfills. This HD 49 strand steel cable has 120 lb. pull strength. Alarming function is easily activated with no tool necessary and cannot be manipulated without the Decoder. Turn unit off with handheld All-in-One Decoder or Easy Switch. Larger battery; 3-5 year standby time. When not protecting product (Pin is not locked) it will go into standby mode. Pinch to length T-Stop to secure tether "lead" position, preventing smaller merchandise from being pulled off balance and allowing proper merchandising of displays. The Smart Tag design provides for perfect placement of the decoder to allow for a quick, one step, easy deactivation, clutch release., or battery replacement.

Key Features

-  **Smart Release Lock**
~Press to lock - Press to Open
-  **One Step Release**
-  **98 Db Alarm**
-  **Over 120lbs pull strength**
-  **Exclusive IR Magnetic Key**
~Unauthorized magnet activates alarm
-  **Replaceable Batteries**
-  **Replaceable Alarm Section**
-  **Replaceable Tether Base**
-  **Upgradable/Backward compatible**
-  **Earth Friendly**
-  **Multi function cable design**
~ Lengths up to 52" / Fully adjustable loop
-  **Perfect Placement of Decoder**
~ Easily deactivate alarm
-  **Strong Visual Deterrent**
~ Blinking LED Light on tether and tag
-  **Flexible 49 steel cables, coated**

The Gen 6 alarming tether systems allows you to protect your merchandise with a smart release lock and alarming tether that talk to each other for an added level of security and eases the deactivation process. Like its predecessor, the Gen5, The Gen6 has replaceable components, the retractable tether, the alarm top, tether battery. Replace them all with ease. No need to remove the tether from the merchandise or the fixture, costing valuable labor. Reuse the functioning parts of the system replacing only the damaged parts saving you on product cost and saving space in landfills. This HD 49 strand steel cable has 120 lb. pull strength. Alarming function is easily activated with no tool necessary and cannot be manipulated without the Decoder. Turn unit off with handheld All-in-One Decoder or Easy Switch. Larger battery; 3-5 year standby time. When not protecting product (smart release lock is open) it will go into standby mode. The Smart Release design provides for perfect loop length and perfect placement of the decoder to allow for a quick, one step, easy deactivation, press clutch release, or battery replacement.

ROD System

SLEEVE System

**CUSTOM
Faceout**

BOOT System

ORC and shoplifting started to become the norm after many states had raised the threshold for shoplifting prosecution. The need for stronger measures grew in relation to the crimes. We are ready to help with Gen6. We spent the majority of 2020 and 2021 testing and revising the Gen6 tether and how to fasten them to fixtures to create a stronger bond, a cleaner look, and help guide the customer put the item back where it belongs thus helping with department recovery. Research, development and in-store tests were our goals in 2020 and 2021, with the cooperation of some of our established customers, we were able to conduct in-store tests. The valuable feedback from the customers, associates, and executives lead to design the “sleeve”, the “rod” and the “boot” which simplify the process for an associate when it comes to tethered items. These systems may not fit your application exactly but we can help develop a system that can work for your brands LP Strategy.

Traditional Installation

Let's have a Tickertape Parade for our new **Tick-r-Tape Tag!**

Key Features

-  **98db Alarming Tag**
-  **AM or RF**
-  **Exclusive IR Magnetic Key**
~ unauthorized magnet activates alarm
-  **Replaceable Batteries**
-  **Earth Friendly**
-  **Conductive Tape**
~ 1 or 2 strips at any length
-  **Disposable Base**
~ Easy on, Easy off
-  **Strong Visual Deterrent**
~ Blinking LED Light
-  **1-6 Alarming Functions**
-  **Unlimited Lifespan**
~ interchangeable parts & batteries

The **Tick-r-Tape** Tag is a compact alarming tag that can range from 1-6 different alarming functions. This tag can be used with one or two strips of our conductive **TAPE** to quickly protect product from tampering or theft. The disposable cradle allows the tag to stick to your product like a **TICK**. So you can protect larger products with out using the tape.

This versatile and customizable tag is perfect for protecting: Sheets, Comforters, Perfume boxes, Televisions, Laptops, Computers, Game consoles, and much more.

This tag has no wires so storage is simple. The tape and the cradle go with the customer so it will not slow the associate down at the POS counter.

www.CISSInc.com

pmorello@cisssinc.com

Key Features

 **2 Alarm 98 dB**

 **AM or RF**

 **EASY ON - EASY OFF**
~Auto Arm feature. Disarm w/ Hand held or Counter-top Magnetic Keys

 **Battery Conservation Mode**
~increases battery life

 **Low Battery Indication**
~Notification sound and light

 **Strong Visual Deterrent**
~Blinking LED Light

 **Conductive Tape or Corner Label**
~ 1 strip at any length

 **Cannot be "jumped"**

 **Water resistant**

TICK R TAPE

Mini

The **Tick-r-Tape Tag Mini** is a compact 2-3 alarming tag that uses conductive tape, a corner label, and/or pressure sensors to replace your standard wire wrap tags. This tag can be used with a strip of our conductive **TAPE** or with our conductive **corner label** to quickly protect product from tampering or theft. The disposable base allows the tag to stick to your product like a **TICK**, so you can protect larger products with out using the tape.

Not only does it make your product better looking than when it is in a keeper. The tag's small size increases on-shelf-availability up to 630%. More items on the shelf means more items available to sell

This versatile and customizable tag is perfect for protecting: Sheets, Comforters, Perfume, Gift Sets, Razor Blades, Cosmetics, Electronics, Tech Toys, Toner, and much more.

This tag has no wires so storage is simple. The tape and the base go with the customer so it will speed up checkout time, enhancing the customer experience.

~ Blinking LED Light
-  **7 strand coated steel cable**
~ custom length (9cm standard)
-  **Cannot be "jumped"**
-  **Water resistant**

The Siren Tag (CISnt501)

is a Dual Alarming Padlock Tag that dynamically deters theft. Long battery life, compact size, and water resistance is not all this tag boasts. Designed with an Auto-Arm feature it decreases the time required to attach and arm the tag. You quickly disarm and remove the tag using a handheld or counter-top detacher. This tamper resistant tag, although small, sends a big message to professional thieves to avoid your protected products. With the Siren's low cost and high ROI it is not just for protecting your high end apparel, handbags, and luxury goods. You can protect all hot button merchandise that is at risk without deterring your actual customers.

NO MORE

The CIS 143

4 Direction Bill Reader

JUST

The CIS 143 reads any bill, no matter the orientation! The CIS 143 approves the bill using Ultra Violet, Magnetic, Infrared, and Water Mark detection.

Saving time and money, the CIS 143 is fast enough to check any bill in less than one second. After a bill is validated, a GREEN LED will light if the bill passes inspection or a RED LED will light if bill is suspect.

The CIS 143 is so accurate that it detects washed bills and “Super Bills”. The counterfeit known as the “Super Bill” is produced on high-end printing presses by professional counterfeiters.

The CIS 143 is fast, economical, and easy to use. The Clamshell design make it easy to clean and easy to clear jammed bills.

It will keep counterfeit bills out of your tills and away from your bottom line.

Key Features

- ❖ 4 direction bill verification
- ❖ Detects USD bills
- ❖ 99.9% Accurate and Reliable
- ❖ Verification speed 1 note < 1 sec
- ❖ Pass or Fail Indicator Light
- ❖ Audible & Visual bill failure notification
- ❖ 2 Modes, front and rear ejection
- ❖ Update from SD Chip
- Ⓛ Portable (AC/DC)
- ❖ Easy to use
- ❖ Clamshell Design easy clean & jam removal

CIS 180

Money Counting Scale & Printer

QUICK - EASY - ACCURATE

**Print Till Count
with
Internal Printer**

**Portable with
included
rechargeable battery**

The CIS 180 is an invaluable tool for retail environments. It is designed to quickly and accurately count both coins and bank notes. With the CIS 180 it takes only minutes (average time 2 minutes) to count a cash drawer. The intuitive programming takes you through all coin and banknote denominations automatically, from the Penny to the \$100 bill. The screen will display the quantity and the value of each denomination as well as the total amount counted during each session. The results can be stored in memory and can be viewed during and after the counting session. To print out the counting session report simply choose the "Print Current Till" option and the internal integrated printer will print out that counting session report with a date and time stamp. The CIS 180 has a rechargeable battery to make it completely portable.

Detect Fake Currency, Credit Cards, Driver's Licenses and More

BJ-136 Bank Note Detector

Small compact design, the latest design enhanced the UV light as well as avoiding direct eye exposure. The White LED back light last 7 times longer than past machines. The Magnetic Ink Detection utilizes an audible alarm and light to recognize suspect bills.

Mini UV Flashlight

A handy easy-to-use tool featuring 14-high output extended life LED lights, which emit a direct UV beam to detect security images, or markers embedded in most currency, major credit cards, traveler's checks, state issued IDs and licenses. It can also detect UV sensitive inks printed on custom receipt rolls.

UV Marker

An economical and convenient device for tracking documents or objects. This felt tip marker applies invisible UV ink to money, merchandise, or any other item which you suspect may be pilfered by employees or stolen and sold at flea markets or through other distributors. Use our mini-UV light or any other black light to make the invisible ink appear.

Jumbo Counterfeit Detection Pen

An easy, economical and effective way to avoid fake currency. Simply make a small mark on the bill and if the ink turns dark brown or black, the bill is suspect. Retailers then may request another bill to pay for the purchase. The pen lasts for up to 30,000 Impressions and features a specially designed tip to prevent drying if left uncapped.

3-D Foam Label

Silver Barcode Label

Security Dot shown in silver (also available in holographic prism)

Barbell Label shown in silver (also available in holographic prism)

Non-Active Security Labels

An inexpensive yet effective added level of theft protection for low-end items that don't warrant the cost of a live security tab. Small, yet noticeable, these tags are proven deterrents to shoplifters. Easily attached to nearly any product, they let retailers make impulse-buy items accessible to customers while discouraging amateur shoplifters.

www.CISSecuritySolutions.com

Scratch & Secure UV Plus

New UV Plus not only changes color when scratched it illuminates under UV light. Defies duplication although it looks like regular ink.

Scratch & Secure UV Plus ink changes color when scratched.

Protect against fraudulent duplication of receipts with Scratch & Secure UV Plus and our patented EAS Core for 5 levels of security!

Security Level 1 - Cannot be copied. If ink is authentic Scratch & Secure UV Plus ink changes color when scratched.

Security Level 2 - Has a double check. Scratch & Secure UV Plus can be activated with a chemical pen changing to a third color to validate secure ink if it has already been scratched to the second color.

Security Level 3 - Scratch & Secure UV Plus will illuminate under UV / Blacklight for easy detection.

Security Level 4 - Deter theft of your POS Rolls. EAS Cores help keep a proper inventory of your POS Rolls and detects theft.

Security Level 5 - Our patented EAS Cores and Scratch & Secure UV Plus technologies are not available on the open market. They are sold exclusively to retailers for internal use.
