# CIS 180

Money Counting Scale & Printer

**QUICK - EASY - ACCURATE**

**Print Till Count  
with  
Internal Printer**

**Portable with  
included  
rechargeable battery**

The CIS 180 is an invaluable tool for retail environments. It is designed to quickly and accurately count both coins and bank notes. With the CIS 180 it takes only minutes (average time 2 minutes) to count a cash drawer. The intuitive programming takes you through all coin and banknote denominations automatically, from the Penny to the \$100 bill. The screen will display the quantity and the value of each denomination as well as the total amount counted during each session. The results can be stored in memory and can be viewed during and after the counting session. To print out the counting session report simply choose the "Print Current Till" option and the internal integrated printer will print out that counting session report with a date and time stamp. The CIS 180 has a rechargeable battery to make it completely portable.
