Are all security wraps alike?
**NO, but the differences are minimal
UNTIL NOW!**

The CIS Scorpion security wrap tag provides product protection like no other. The auto retracting, adjustable, and customizable wrapping section expand the range of products that can be protected with our 3 alarm Scorpion. The auto retracting design keeps the 7 strand coated steel cable from getting tangled and makes storage a breeze. Unauthorized Magnetic Keys will cause the alarm to sound if a thief attempts to deactivate the Scorpion. CIS' Exclusive IR Magnetic Key is the only way to deactivate the Scorpion tag and with our universal design our IR Magnetic Key can deactivate most other wrapping tags in the market today. Interchangeable alarm component, wrap segment, and replaceable battery help create the Scorpion's **Unlimited Lifespan.**
